The new AZKR case from bwh

As all of a piece!

The new **AZKR case** is a real piece of jewelry outstanding by individual functionality.

Not only customized measurements are available but also following standard sizes:

Etuais:

length x width x bottom height + lid height

325	240	13	13 mm
435	335	13	13 mm

Cases:

length x width x bottom height + lid height

345	255	112	35 mm
420	300	35	35 mm
460	340	112	35 mm
490	390	112	35 mm
595	395	112	35 mm
440	320	76	35 mm
440	320	35	35 mm
420	300	35	22 mm

Well designed for strong demands – sophisticated experience stands behind this new **AZKR case** from bwh. It is based on high quality anodized aluminum profiles and break-proofed plastic corners. As a result there is a case which catches your interest by timeless elegance and also by great variability: Case length and width to be defined by you without any tool costs! Outer surface designed by your wish and needs. Interior – independent from measurements – no rivets or other fixing material visible.

At this point and in our customer magazine we portray demanding, intelligent case systems which we have designed and constructed for our customers – we would be happy to manage your case project, too! If you are interested, please contact us.
