Maximum security: the SkyBox protects valuables

Developed for special demands

For protection of valuables extraordinary ideas are necessary. bwh Koffer refines these ideas and creates solutions to secure the value of your goods. Sometimes these ideas are particularly robust ones. The SkyBox was developed in cooperation with experts of Emirates Group. It is designed for transport by truck, vessel or airplane. All safety standards to protect the goods transported are considered:

No matter if sensitive pharmaceuticals, computer accessories, mobiles, precious metals, art goods or hazardous materials, all this is protected against theft, weather conditions and rough impacts.

Individual ideas become exclusive cases - made by bwh Koffer

bwh Koffer is always developing and manufacturing special case solutions to suit clearly defined user requirements.

Each case is always made with the same precision and care, too, whether it is a design-orientated presentation case or a high-security transport box. bwh Koffer is the market leader and a recognized specialist in manufacturing prestigious and high-quality cases and boxes. bwh Koffer is always the right partner for you.

A well-thought-out security concept

The SkyBox can, if required, be equipped with the innovative 'pylock' locking system from bwh's partner 'Lock Your World'. 'pylock' is an electronic locking system offering best possible security. The box can only be opened via the 'py Key' (portable keyboard) with a PIN code and also a non-recurring code procedure. The data transfer to the lock is resistant to manipulation.

Convincing Engineering

- Made of high-quality HDPE plastic
- Extends maximum load up to 4,000 kg – net weight only 62 kg
- Stackable and shockproof: withstands extreme loads
- Temperature-resistant: from -40°C to +80°C
- Space for Euro pallet: 120 x 80 cm, expandable
- Inside height: min. 70 cm up to 130 cm, adjustable in steps of 5 cm
- Lock with security seal, cable drum with steel rope
- Airworthiness according to the ATA certification, Spec 300 CAT
- Door-to-door guaranteed security
- Optional: the 'pylock' locking system to prevent misuse
- Optional: GPS-aided track and trace
